

## Smart Capital

### A Successful Exit

Should the sale of A.L.A by major shareholder A.I.P to H.I.G. Capital be cleared, by tendering its stake to the following mandatory PTO, Smart Capital will cash-in around EUR 15M, about 2.6x the direct and indirect investment in the company. It is a successful exit from an important investment, which, through a club deal, also allowed four important Italian families to act as a cornerstone investor, which is a key element in value creation for shareholders.

#### The investment in A.L.A. ...

At the A.L.A. IPO in July 2021, SMART A.L.A. was established by Smart Capital and an investors club deal, to act as a cornerstone investor. Also including further purchases in 2022 and 2023, Smart Capital invested in A.L.A. around EUR 4.5M (4.5% of capital).

#### ... and the minorities buy-back

In March 2025, Smart Capital bought back a minority stake of 32.93% in SMART A.L.A. SPV owned by the club deal of investors which joined at the A.L.A. IPO, for EUR 2.5M. The vehicle, 100% owned after the minorities buy-back, in turn owns a stake in A.L.A., amounting to 4.542% also including shares directly owned by Smart Capital.

#### The PTO on A.L.A.

A.I.P. Italia, A.L.A.'s major shareholder, has recently signed an agreement to sell its 73.78% stake to the private equity player H.I.G. Capital, for a consideration EUR 36.5/sh. cum dividend (or EUR 35.75 ex the EUR 0.75/sh. dividend to be paid on 21 May). The closing is subject to possible adjustment and to usual conditions precedent, including FDI, antitrust and Golden Power. After closing, a mandatory takeover bid will be launched, aimed at delisting the company from EGM.

#### A successful exit

We believe that Smart Capital will tender its stake in the PTO, thus achieving a successful exit:

- A return of around 2.6x on the direct and indirect investment in A.L.A. since July 2021;
- The company will cash-in around EUR 15M from tendering its stake, then available for new investments. We estimate a capital gain of around EUR 9M;
- Smart A.L.A. club deal allowed four important Italian families to join A.L.A. IPO as a cornerstone investor, an investment which would have been difficult to make individually. Moreover, it allowed an earlier exit through Smart Capital minority buy-back

### Valuation methodology (long-term horizon: 12M)

The Intesa Sanpaolo SpA Equity Research Department values the companies for which it assigns recommendations as follows:

We obtain a fair value using a number of valuation methodologies including: discounted cash flow method (DCF), dividend discount model (DDM), embedded value methodology, return on allocated capital, break-up value, asset-based valuation method, sum-of-the-parts, and multiples-based models (for example PE, P/BV, PCF, EV/Sales, EV/EBITDA, EV/EBIT, etc.). The financial analysts use the above valuation methods alternatively and/or jointly at their discretion. The assigned target price may differ from the fair value, as it also takes into account overall market/sector conditions, corporate/market events, and corporate specifics (ie, holding discounts) reasonably considered to be possible drivers of the company's share price performance. These factors may also be assessed using the methodologies indicated above.

### Equity rating key: (long-term horizon: 12M)

From 22 November 2024, in its recommendations, Intesa Sanpaolo SpA uses a relative rating system on a 12M horizon, whose key is reported below. Intesa Sanpaolo's investment ratings reflect the analyst's/analyst's team assessment of the stock's total return (the upside or downside differential between the current share price and the target price plus projected dividend yield in a 12M view) as well as its attractiveness for investment relative to other stocks within its coverage cluster.

A stock's coverage cluster is comprised of stocks covered by a single analyst or two or more analysts sharing a common industry, sector or other classification. The list of all stocks in each coverage cluster is available on request.

**Equity Rating Key (long-term horizon: 12M)**

Long-term rating	Definition
BUY	BUY stocks are expected to have a total return of at least 10% and are considered the most attractive stocks in the analyst's/analyst's team cluster in a 12M period.
NEUTRAL	NEUTRAL stocks are expected to have a total return of at least 0% and are less attractive stocks than BUY rated stocks in the analyst's/analyst's team cluster in a 12M period.
UNDERPERFORM	UNDERPERFORM stocks are the least attractive in a coverage cluster in a 12M period.
RATING SUSPENDED	The investment rating and target price for this stock have been suspended as there is not a sufficient fundamental basis to determine an investment rating or target price. The previous investment rating and target price, if any, are no longer in effect for this stock.
NO RATING (NR)	The company is or may be covered by the Research Department but no rating or target price is assigned either voluntarily or to comply with applicable regulations and/or firm policies in certain circumstances.
TENDER SHARES (TS)	We advise investors to tender the shares to the offer.
TARGET PRICE	The market price that the analyst believes the share may reach within a 12M time horizon.
MARKET PRICE	Closing price on day prior to issue date of the report, as indicated on the first page, except where otherwise indicated.
Note	Intesa Sanpaolo assigns ratings to stocks as outlined above on a 12M horizon based on a number of fundamental drivers including among others, updates to earnings and valuation models. Exceptions to the bands above may occur during specific periods of market, sector or stock volatility or in special situations. Short-term price movements alone do not imply a reassessment of the rating by the analyst.

**Important Note:** The current rating system has been in place since 22 November 2024. On 7 April 2025, the rating names were subsequently updated to BUY (previously BUY), NEUTRAL (previously HOLD) and UNDERPERFORM (previously SELL) on an unchanged rating methodology. Please refer to the ISP Equity Rating informative note of 22 November, subsequently updated on 7 April 2025, for further details at the following link: <https://group.intesasanpaolo.com/it/research/equity---credit-research>. Intesa Sanpaolo had previously used an absolute rating system based on the following ratings: BUY (if the target price is 10% higher than the market price), HOLD (if the target price is in the range 10% below or 10% above the market price), SELL (if the target price is 10% lower than the market price). After 22 November 2024, analysts review and assign ratings on their coverage according to the rating system presented above. For additional details about the old rating system, please access research reports dated prior to 22 November at <https://cardea.intesasanpaolo.com/homepage/#/public> or contact the research department.
